

Forklift Electrical Part

Forklift Electrical Parts - Forklifts can be specifically marked to be used in dangerous places. A labeled truck indicates the design has met the lowest requirements of ANSI/UL 558 intended for engine powered forklifts or ANSI/UL 583 utilized for electric trucks for the type of label put.

The application for labels meant for lift forklifts could be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance provider and Fire Marshall for more information about the approved uses of industrial powered forklifts in your application.

If the specific forklift satisfies the outlined criteria, labels may be put. A labeled lift truck will show the type of designation placed on the nameplate and will have a properly corresponding label put.
